Gibbon offers an explanation for why the Roman Empire fell, a task made difficult by a lack of comprehensive written sources, though he was not the only historian to tackle the subject. Most of his ideas are directly taken from what few relevant records were available: those of the Roman moralists of the 4th and 5th centuries.

The History of the Decline and Fall of the Roman Empire is Edward Gibbon's magnum opus, written and published over a 13-year period beginning in 1776. It not only chronicles the events of the downfall starting with the end of the rule of Marcus Aurelius, but proposes a theory as to why Rome collapsed: the populace, Gibbon theorizes, lost its moral fortitude, its militaristic will, and its sense of civic duty. History is considered a classic in world literature, and Gibbon is sometimes called the first "modern historian" for his insistence upon using primary sources for his research. Many scholars today still use his highly regarded work as reference. In this last of seven volumes, readers will find Chapter 64 ("Moguls, Ottoman Turks") through Chapter 71 ("Civil Prospect of the Ruins of Rome in the Fifteenth Century"), which cover the establishment of the Mogul empire and their conquests of China, Persia, Anatolia, and Siberia; the origin of the Ottomans; the establishment of the Ottomans in Europe; the history and life of Timour (Tamerlane); the siege of Constantinople by Amurath II; the reign of John Palaeologus II; the invention of gunpowder; the continued struggles between the Greeks and Latins for influence in the Eastern Roman Empire; the reign of Constantine (the last emperor of the Eastern Roman Empire); the reign of Mahomet (Mehmed) II of the Ottoman Empire; the siege of Constantinople; a summary of the state of Rome since the 12th century; the life of Petrarch; the Great Schism of the West; and the final decay of Rome in the 15th century.
